

# Installing a Local Landmark Plaque

You received your Local Landmark Plaque and now it is time to install it!

\* Two screws are included

Place the plaque on any type of paper that will allow you to trace the outline of the plaque.

Once you have a template traced on your paper, proceed to cut the template out.

Check the template against the plaque. Mark the drill holes on the paper.

Make sure that the holes are clearly marked to allow for proper measurement.

Secure the template in the plaque's desired location.

Drill each of the two holes completely to allow for the insertion of the screws.

\*Remove template

Flip the plaque over to the back. Locate the two drill holes.

Attach the two screws. Go as far as possible into the plaque. \*Optional, Add double sided tape to back.

Fill the drill holes with your choice of adhesive. Line up the screws and push the plaque flush with the wall.
